TECHNICAL OPERATIONS SECTION

RE: Facility No. WAD 009422411

Dear Mr. Hofer:

This is in response to Alexandra Smith's April 1, 1983 letter and your letter of June 1, 1983 both concerning Part A and B RCRA applications and related matters.

Pacific Wood Treating Corporation hereby formally advises the agency that it will decline to submit a RCRA Part B application. In conjunction with this decision we have modified certain waste treatment and handling operations as well as discontinued the burning of hazardous waste in our hog fuel boiler. In addition, we expect to prepare and submit to you, by November, closure and post-closure plans to the extent they are required for certain of our facilities to which Part B permit would have been applicable.

Accordingly, RCRA standards application to generators of hazardous waste, 40 CFR 262, will apply to our operations rather than the 40 CFR 264 or 40 CFR 265 standards. We assume that we will retain the identification number referenced above for use on manifests and reporting purposes.

If there are any questions regarding the above, please call Mr. Vince McQuiggin at 887-3562.

Cordially,

PACIFIC WOOD TREATING CORP.
